

Eco Escape Game

Immersive survey

Quésaco ?

This ecological and futuristic **Eco Escape Game** on the latest IPCC report will allow your teams to raise awareness on environmental issues.

In the near future, a mysterious scientist has given life to an Artificial Intelligence to help him in his search for a solution to climate change. After years of careful parameterization, the AI is able to give humanity THE solution to fight effectively against climate change. This new form of intelligence, sent into the present to help us, will only reveal its secrets to those who overcome its enigmas... Collaborators will have 1 hour to decipher the AI's security system by decrypting the IPCC report.

Organization

Course of the activity :

Briefing (15 min approximately) - Eco Escape Game (60min)
- Debriefing (30min approximately)

As a souvenir :

Post-event sending of photos taken during the activity.

Optional :

- Storytelling adapted to the company
- Gifts for the participants
- Teams will receive a «zero waste» eco-guide and the IPCC report data to remember.
